

KIOSYS IndustrialPoint

The ideal solution for industrial applications where small footprint and rugged design are required

- Sleek design
- Rugged steel enclosure
- Free-standing or wall-anchored
- High-quality 15" Elo-touch screen
- Options:
 - Magnetic card reader
 - Vandal resistant keyboard
 - Complete acoustic system
 - Customer defined colours

The KIOSYS IndustriaPoint has a compact sleek design and can be easily modified to incorporate additional options including a card reader, vandal resistant keyboard or speakers as required by the customer application.

Standard units incorporate an Elo-touch touch screen, but this can be changed for a standard XGA 15" TFT, providing a lower cost solution when a touch screen facility is not required.

The unit has a small footprint and can be bolted to the floor or wall mounted, which means it can be installed even in situations where space is at a premium.

Blazepoint provides a standard PC with the unit, or alternatively there is an option for customers to specify and procure their own PC's for integration into the kiosk. This may be a lower cost solution for customers and ensures that the final solution exactly matches the requirement.

The KIOSYS IndustrialPoint provides our customers with a flexible kiosk solution at a reasonable price.

TECHNICAL SPECIFICATIONS - KIOSYS IndustrialPoint

Enclosure

<i>Type:</i>	Steel enclosure free-standing or wall-anchored
<i>Dimensions:</i>	Height: 1378 mm Width: 485 mm Depth: 190 mm
