

OUTDOOR Series

The ideal kiosk solution for outdoor use

- Brushed metal enclosure
- Free-standing unit
- High-quality 15" TFT display
- Options:
 - Rugged keyboard module with trackball
 - Complete acoustic system
 - Climate control
 - Secure PC housing
 - "Designer" panels

Built to withstand snow, rain, storms or heat, the OUTDOOR kiosks are ideal for outdoor siting in the open air or beneath a canopy. Also suitable for indoor use, they are distinguished by their attractive appearance, high level of function, and robustness.

The OUTDOOR Series can benefit from perfect climate control by installing fan and filter units as optional extras. The all-round foamed-in seal ensures the cabinet is air tight, and thanks to the latch and lock insert, only authorised personnel can enter. The OUTDOOR Series is available in two different versions:

OUTDOOR Flex

The sleek exterior makes this kiosk eye-catching. Interchangeable monitor covers are a modular feature and their shape and colour can be configured to order.

OUTDOOR Modul

This kiosk is characterised by simple elegance. The OUTDOOR Modul is only available without keyboard.

TECHNICAL SPECIFICATIONS – OUTDOOR Series
