

Blazepoint and Zebra help SEBEV Search & Rescue modernise their ID Operations.

SEBEV is a charity that supports Thames Valley Police in Searching for Missing Vulnerable

persons, and provides support for the local authorities and the statutory emergency services during civil emergencies in the Thames Valley area.

SEBEV is made up wholly of volunteers who manage their time with SEBEV around work and family commitments. They have their own fully equipped Incident Control Vehicle, plus all equipment necessary for rescue and First Aid purposes.

SEBEV mainly fundraise by offering first aid and marshalling at events, along with donations from councils, Thames Valley Police and other companies such as Zebra & Blazepoint.

According to Daryl Toogood from SEBEV "we approached a number of manufacturers, Zebra and their Elite Partner Blazepoint were the most

helpful who offered an all-round sponsorship package, whereas others were just able to sell us a printer at a discounted price, and not an after-sales service."

The Challenge

SEBEV felt that their identification system was inadequate. They needed to produce hard wearing and durable ID cards that would withstand use in all weathers and terrains.

They were looking for a system that runs on a Windows powered laptop to print plastic ID cards, capable of having text, graphics and photos printed on to them.

The Solution

- The Zebra P310C plastic card printer due to its space-saving, small footprint that make it ideal for desktop applications.
- TrueColour Ribbons for crisp and improved image quality.
- Nfive's Card5 plastic card design software with its powerful imaging features facilitating layout of the card, database connectivity and instant printing.
- Blazepoint, as the only Zebra only distributor, with focused product knowledge, and ongoing technical support coordinated integration of the solution.

The Results

The solution will directly aid SEBEV's identification processes. The team now have a dependable, flexible system on which they can rely.

"It will provide us with a professional looking, hard wearing, durable ID card that our members will be able to carry with them everyday" said Daryl
