

## STANDALONE *curved*

*The ideal solution for interactive kiosk applications with eye-catching graphics for indoor use*

- Brushed metal enclosure
- Free-standing unit
- Aluminium/Steel enclosure
- High-quality 15" TFT display
- Options:
  - Rugged keyboard module with trackball
  - Complete acoustic system
  - Climate control
  - Secure PC housing
  - "Designer" panels

The STANDALONE *curved* kiosk is a successful symbiosis of aesthetics and function. This enclosure, which is ideal for indoor settings, combines high standards of design with individuality and function.

This kiosk unit offers versatile design opportunities and extensive functionality on a minimum footprint. The front and designer panels are available in aluminium, spray finished sheet steel, stainless steel, or in a range of decorative finishes (e. g. marble, wood). A real wood insert is also available. Alternatively the front panel can be used as a branding space, which enables you to get your message across to your customers.

Designed for style and engineered for high performance, the STANDALONE *curved* is the platform you need to run state-of-the-art self-service applications in virtually any environment.
