

## KIOSYS StandPoint

*The convenient and professional way to display company and product information*

- Rugged aluminium enclosure
- Free-standing unit
- High-quality 17" touch screen
- Integral A4 kiosk printer
- Ease-to-maintain slide-out construction
- Options:
  - Magnetic card reader
  - Rugged keyboard module
  - Customer defined colours
  - Short-term rental

The KIOSYS StandPoint is a robust, secure computer display terminal designed for unattended use by the public. The PC, touch screen and printer are housed in a tough aluminium casing and the whole unit can be secured to a wall or bolted to the floor.

Providing internet or intranet access the user drives software and services via a highly responsive touch screen interface. If hard copies of information are required then the direct thermal printer, with its shielded dispensing output, is capable of producing print-outs of up to A4 width. Direct thermal printing technology has no requirement for inks or consumables, which keeps maintenance to a minimum and the cutter/paper dispenser ensures that users cannot strip paper from the printer.

The KIOSYS StandPoint is also available on a short-term rental basis for exhibition use or for pilot projects.

*Examples of other colour schemes*

## TECHNICAL SPECIFICATIONS – KIOSYS StandPoint

### Enclosure

<i>Type:</i>	Rugged aluminium enclosure Free-standing kiosk
